

1U STMIX

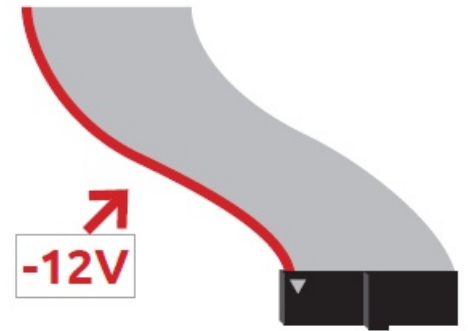

USER MANUAL

POWERING THE
MODULE

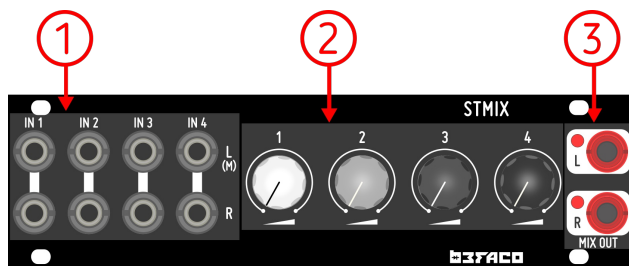

THANKS FOR PURCHASING A MODULE FROM BEFACO!
BEFORE YOU PLUG THIS MODULE IN...

1. **Disconnect your cabinet from the mains.**
2. **Triple check the power cord polarity.** The coloured line on the cable (pin number one) is the -12V rail.
3. If you plug the module backwards you might burn it out and unfortunately this is not covered by the warranty.
4. If you have any questions about this product please send them to: support@befaco.org

INTRODUCTION | STMIX

STMix is a four channel stereo mixer in 28hp and 1U format. It can work independently or as expansion of our Hexmix module via the six pin connector located in the back. The module is designed under the Intellijel 1U format.

MODULE
REFERENCE | PANEL OVERVIEW

1. Channel's Inputs

Stereo input of each channel. Use the Left input of each channel for Mono signals. All the inputs are AC Coupled to maximize audio performance.

2. Channel's knobs

Manual attenuation controls of each channel input.

3. Output

Main stereo output of the module. When Mono signals are present on the channels, a duplicate of those signals will be present on the Right output

FEATURES

CONNECTING THE UNIT TO HEXMIX

STMix can work as useful submix expansion for Hexmix. Connecting both modules with the included six pin ribbon cable (X2 port), the output signal of STMix will be present into Hexmix master section.

Disclaimer: This port is only compatible with Hexmix! Don't connect it to any other port like the rear Jack connections of our 7U Case.
